

2019 Kit Graduate School Program Introduction

ABOUT kit

1. Vision and Specialization

Since the foundation in 1980 as a university specialized in engineering, kit has cultivated practical and creative engineering talents necessary for the development of national industry. To make a big push, kit has been committed to the growth of students, faculty members, regional communities, and national scientific technology through the advanced curriculum and education programs. Kit has been recognized for having infinite potential for growth, a high-quality practical education system, and a high postgraduate employment rate.

Therefore we are going to elevate our status as the most powerful national engineering university by developing scientific technology and multifunctional talents, leading the industry academy cooperative research based on challenging and creative spirits, and becoming a glocal (global+local) university with regional communities.

Future education should focus on nurturing creative talented individuals and contributing to the development of regional communities. To this end, universities have to make innovations in the fields of education, research, and cooperation of academy and business. Matching the changes in universities, kit changes the education system to develop sufficient experience based self-directed engineers, and strengthens the foundation for developing regional community and the nation by training multifunctional talents with right personality and leadership.
